Compound 15/15/15

Exclusive Compaction Method in Compound Binding for Best Performance

A premium, compaction compound with consistent particle size built in constant nutrients content; can be broadcast manually or mechanically. Well acceptable by planter in Malaysia climate and soil condition.

Technical Analysis:

Nutrients content	%N	$\%P_2O_5$	$\%K_2O$
	15	15	15
Sources	AC, MAP & MOP		

Size: 300 to 350 SGN

Uses:

1. Ideal for seedling in nursery stage and young palm.
2. Induce healthy frond and trunk growth.
3. Stimulate early growth for flowering and healthy fresh fruit bunch.

Usage: Application rate—500g to 1kg per palm; every 2 months.

Packing: 50 kg per bag

Features:

1. Consists of highly water soluble phosphate.
2. A premium fertilizer to assure even distribution to provide balance nutrition to mature tree and palm.
3. Will provide continuous nutrients supply after the application.
