Imported from Japan

Dr Green

- Increase plant resistant against disease caused by fungus and bacterial.
- Biological control of nematode and insect.
- Revitalise plant cell, therefore improve vegetative and root growth.
- Improve photosynthesis by providing direct carbohydrate food source.

Dr Green *Foliar* (DrGF)

Complete Carbohydrate complex

Material : 20% long chain molecules
: 80% short chain molecules

Application :
- Dilute 1 liter to 1000 or 2000 liters of water; or 500ml to 5000 sq.m and spray on the foliage. Repeat every 7-14 days.
- Best mixed with Seamino, Seaweed Organic and Green seaweed to improve photosynthesis of green and turf under shade. Repeat application every 7-14 days.
- Can be mixed with fungicides and insecticides. Suggest to mix with Seamino to improve recovery from the attack.

Dr Green *Drenching* (DrGD)

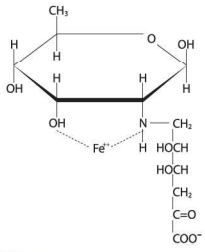

Complete Carbohydrate complex

Material : 80% long chain molecules
: 20% short chain molecules

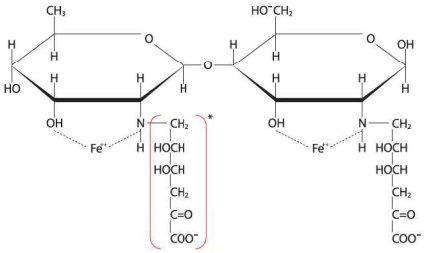

Application :
- Dilute 1 liter to 1000 or 2000 liters of water and drench into the soil. Repeat every 2-3 months.
- Or use 1-3 liters for 1 hectare. Water 10-15 minutes after spray.
- Control of soil born disease, best use with Osmac-G and fungicide.
- Control of Nematode, mix with Osmac-G (1-2 liter/ha).
- Stimulate rooting, mix with Seaweed organic (4-8 liter/ha) before and after growing, verticutting and hollowtining.

Dr Green's Molecule Structure

monomer

dimer

Packing:

- 500ml / bottle.

Strorage:

- Keep in dry place.
- Keep away from foodstuff and children.

Imported from Japan

Dr Green

Why your turf / ornamental will benefit from Dr Green

- The complex carbohydrate provide immediate food to the turf and plants under continuous stress condition like closely mowed green, pest and disease outbreak and under shade condition.
- Natural way of control nematode population.
- Raduce hamful effect of salt accumulation due to the repeat application of chemical fertilizer.
- Release and unlock Phosphorous in the soil to the plants in slow release form.

Improve root density

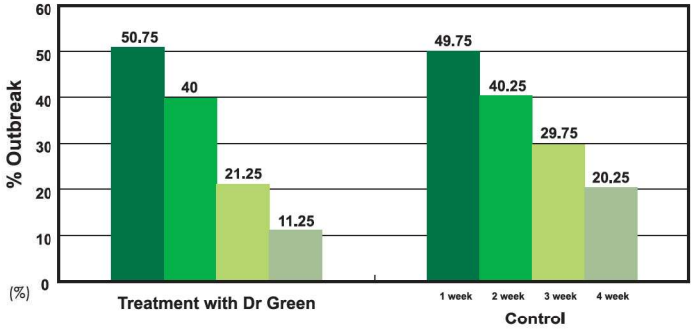

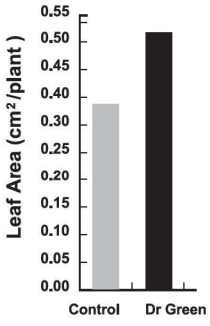

Dr Green Control Effect on Fungus Attack

Treatment	Before	After	Improvement
Dr Green	51%	11%	78%
Control	50%	20%	60%

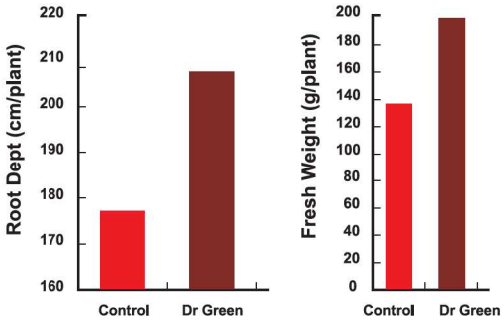

Improve Fungicide Efficacy by 30%

Improve Vegetative Growth

Improve Rooting
